

Original Equipment Manufacturer (OEM)

Made to measure developments
of highest quality
by KABE LABORTECHNIK

Our products are made to measure: tailored to your particular needs!

As Original Equipment Manufacturer (OEM) KABE LABORTECHNIK realises in addition to its regular product range made to measure developments of highest quality – either for end users or our system partners.

As producer we have the possibility to offer our clients products which are tailored to their particular needs.

Our range extends from the precise filling of your reagents on our in-house filling-systems, through specific preparations right up to the composition and packaging of several kits. Even a customised packaging is possible. Benefit from our long lasting experience and know-how in the field of laboratory and medical technologie and plastics processing!

Contact us and tell us your wishes and ideas – we will be glad to care about them!

The common path

Customer request

Cost evaluation
Advancement of the product idea

Conceptional design/preparatory phase

Workflow
Time management

Prototype phase

Validation of the product

Optimisation phase

Optimisation up to the final approval,
if necessary certification

Production

Our core competencies along the value-added chain

- ▶ A project leader will be your contact person
- ▶ Our quality management attends the whole process according to the international directive DIN EN ISO 13485
- ▶ Our purchasing department takes care of a quality- and cost-conscious purchase of components and manufacturing parts from longterm audited suppliers
- ▶ The visual planning of the products is carried out in our design/development department using common 3D programmes
- ▶ Our toolmaking/engineering department provides the necessary elements to produce your products
- ▶ Through the use of own injection molding and assembling machines the whole manufacturing process can take place in-house
- ▶ Preparation of reagents and solutions in our own laboratory as well as their filling on in-house machines
- ▶ Design adaption to the clients' CI
- ▶ Packing of the products due to clients' requirements – a graphically adapted version of packaging is possible as well
- ▶ If requested or as far as possible, we deliver the products ourselves – otherwise the distribution is carried out by selected parcel services or forwarders

KABE LABORTECHNIK – because health is a matter of trust!

In addition to the development of individual products according to customer requirements, KABE LABORTECHNIK offers a varied range of laboratory materials and instruments for the medical laboratory:

- ▶ Venous blood collection systems for human sample collection
(Primavette® S and V and KABEVETTE® G)
- ▶ Venous blood collection systems for veterinary sample collection
(KABEVETTE®; Primavette®)
- ▶ Capillary blood collection GK
- ▶ Plastic and glass capillaries
- ▶ Extensive range of accessories for the above mentioned blood collection systems
- ▶ Treated test tubes and collection vessels for blood, urine and faeces analyses
- ▶ Untreated test tubes and reaction vessels, laboratory items made of plastic
- ▶ Consumables for the treatment of pathological/histological samples
- ▶ Devices and consumables for blood sugar determination
- ▶ Devices and systems for determining the blood sedimentation rate
- ▶ Mixers for blood samples and other liquid samples
